INDIAN DIPLOMA IN CRITICAL CARE MEDICINE

Approved by the

ISCCM

Indian Society of Critical Care Medicine

Dadar, Mumbai- 400028, India

INDIAN DIPLOMA IN CRITICAL CARE MEDICINE

(IDCCM)

01. Introduction

IDCCM aims at improving the quality of doctors working in the Critical Care department. In the present era of scientific and technological advancement, doctors also need to update their knowledge and skill so as to provide cost effective quality care to patients in different specialty areas. IDCCM has been planned in order to prepare the qualified doctors to function effectively in all adult intensive care units.

02. Goal

The goal of the critical care diploma programme is to provide specialized training in critical care departments which can provide tertiary level care to produce competency in various fields of management of the critically ill. Over a stipulated period of one year these specialists should be capable of providing high quality care in tertiary care centers. They shall recognize the health needs of the community and carry out professional obligations ethically and in keeping with the objectives of the Health Policy.

03. Objectives

After completing the IDCCM course the trainee should be able to:

Provide intensive care of high standard to the critically ill adult patients using advanced therapeutic and supportive modalities and skills.

Implement a comprehensive follow up and early intervention for the “At Risk” patients

Seek and analyze new literature and information in Critical care and practice evidence based medicine

Demonstrate adequate managerial skills.

Work as a productive member of the interdisciplinary team consisting of doctors, nurses and grass root functionaries providing care to the critically ill.

04. Syllabus

The Syllabus of course content, teaching, learning methods and activities of the programme are designed keeping in mind the guidelines issued by Indian Society of Critical care medicine.

- The candidate must have gained experience in the diagnosis and treatment of patients with serious medical and surgical disease including coronary artery disease and neurosurgical disease.
- During the training the candidate must gain knowledge in two aspects - The knowledge about pathophysiology, diagnosis and treatment of a series of disease processes and skills of specific procedures and interventions that the candidate must be able to perform.

A detailed break-up of the core knowledge and skills expected to achieve during the course is given in the ISCCM website www.isccm.org

5. Exams

- Eligibility for appearing in Exam of IDCCM
    - Candidate are eligible to appear for the IDCCM exam after satisfactory completion of the specified training period in a recognized center for the IDCCM
- In-training assessment of candidates
    - Candidates are assessed at monthly intervals by the teacher for progress towards appropriate goals
    - The CoBaFolio competencies record book should be maintained by IDCCM candidates under the supervision of their teachers that will track the attainment of specified competencies in critical care.
- Mandatory requirements to be completed prior to exam
    - Certificate from the teacher/institute stating satisfactory completion of training. This training should include attendance at workshops including ACLS, hemodynamic monitoring & mechanical ventilation, review courses etc.
    - CoBaFolio competencies record should be duly filled.
- Written exam
    - The written exam for the IDCCM will be held every year in March and in July (Center may vary)

    - It consists of multiple choice questions.
- Oral exam

  The oral exam is conducted by a panel of four examiners over one day and includes
    - Two typical ICU cases scenarios (each case scenario by two examiners) on which questions will be asked by the examiners.
    - Table viva on ACLS proficiency and airway skills
    - Table viva on interpretation of ECG's, lab reports, X rays, CT scans.
    - Table viva on setting up of a ventilator, setting up of hemodynamic monitoring like central line/arterial line/Swan Ganz insertion skills and bedside monitoring of a critically ill patient.
    - Table viva on commonly used drugs.

All exam results will be sent to the candidates & displayed on the website in about one month after the exam. Candidates who pass the exam will receive the certificate by post.
